DETAILED ACTION

1. The Amendment filed on 1/26/05 has been entered.

Election/Restrictions

2. Applicant's election of Group I in the reply filed on 1/26/05 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). It is noted that Applicant simply states traversal on the grounds set forth by the Examiner without any corresponding arguments traversing the restriction requirement. The lack of the same is the basis for the above.

3. Claims 27-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/26/05 for the reasons stated supra.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the

various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over King et al (US 6,220,329) in view of Simpson et al (US 5,641,551).

King et al discloses the invention substantially as claimed except that King et al is silent on the claimed four different patterns. However, Simpson et al teaches an apparatus method for cutting webs wherein multiple patterns may be cut out by a cutting assembly. Note Fig. 2. Simpson et al's teachings suggest to one of ordinary skill in the art that multiple pattern cutting is desirable for more efficient run of orders during the operation of the invention. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the invention of King et al with the multiple pattern adaptability, e.g. the claimed four patterns as taught and suggested by Simpson et al in order to facilitate fulfillment of multiple orders of different patterns.

Regarding claim 5, although modified invention of King et al is not explicit on the specific pattern, i.e. dragon tooth, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the modified invention of King et al with the dragon tooth shape in order to facilitate production of one of various well known shingle designs, since such a modification would have involved a mere change in the shape of a component. A change in shape is generally recognized as being within the level of

ordinary skill in the art, especially since such a change does not render unexpected or unobvious results. *In re Rose*, 105 USPQ 237 (CCPA 1955).
